

BAKER SF1200
SHOCK FREEZER Roll-in

The SF1200 provides large capacity and combines flexibility and ease of use in a single cabinet, supporting a wide range of operations in the workflows of professional bakeries and patisseries.

The unit is designed for trolleys measuring up to 720 mm (W) x 907 mm (D) x 1880 mm (H), and the heated stainless-steel floor with integrated ramp, for easy loading and unloading of rack trolleys, supports a healthy, ergonomic working environment and efficient workflows.

The intelligent controller gives you full command of the blast chilling/freezing processes. Choose from three preset freezing programs, which cover the most common stages, or easily customise the settings to suit your specific routines and needs using the user-friendly control panel.

With stable temperature zones, it is a reliable and trouble-free cabinet, and minimal supervision is required during the process, as it automatically switches to storage mode once the freezing process is complete.

The rounded corners and removable magnetic gaskets, as well as a stainless steel interior and exterior, make it easy to maintain optimal hygiene.

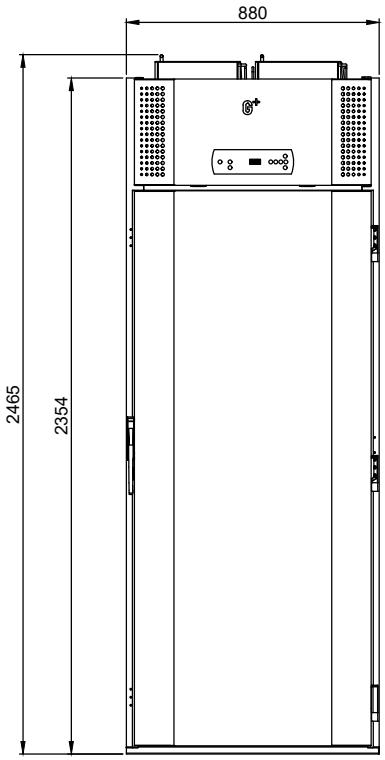

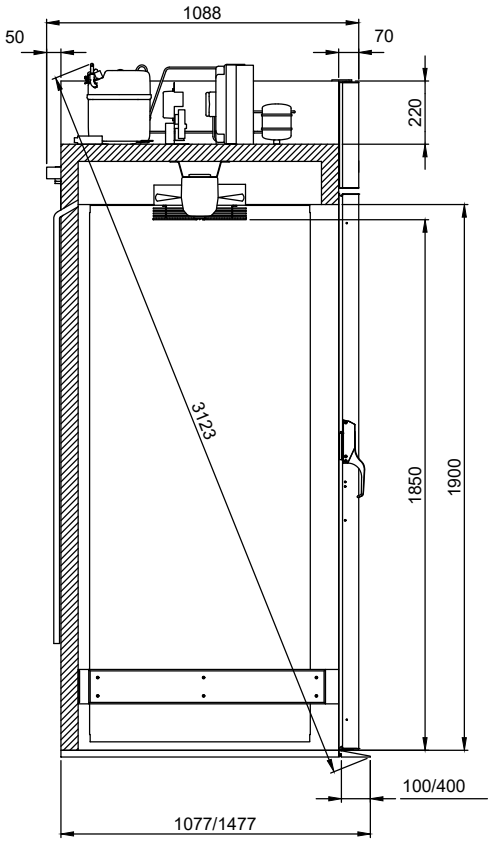

Standard Equipment :

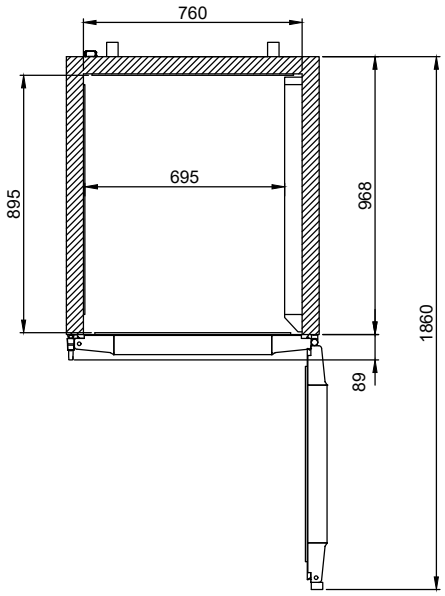

- Stainless steel interior and exterior
- User-friendly touch display with preset and customisable programs
- Durable and easy to clean finish
- Reversible, right-hinged self-closing door with lock
- Ventilated cooling system
- Efficient LED lighting
- Suitable for various rack trolley formats
