BAKER 650 STORAGE CABINET

The BAKER 650 is a robust and reliable storage cabinet, built for the demanding everyday use of professional bakeries and patisseries. It offers high temperature stability and rapid temperature recovery, even with frequent door openings.

As the model is both low in height and narrow in depth, it can be installed in areas with low ceilings and narrow corridors. The compressor is located at the bottom of the cabinet, which allows the contents to be stored at a user-friendly height and easily accessible. The internal shelf supports accommodate 20 baking trays in 40 x 60 cm.

The chiller has an extended temperature range from -5 °C to +12 °C and stable dry cooling, which guarantees minimal condensation on cakes and pastries and the optimized evaporator is also particularly resistant to the high acidity caused by sourdough, ensuring a long service life and reliable operation under intensive use.

Standard Equipment:
- Stainless steel interior and exterior
- Reversible, right-hinged self-closing door with lock
- Removable heavy-duty door gasket
- Ventilated cooling system
- All chillers are with extended temperature range and dry cooling
- Efficient LED lighting
- 20 sets of shelf support rails

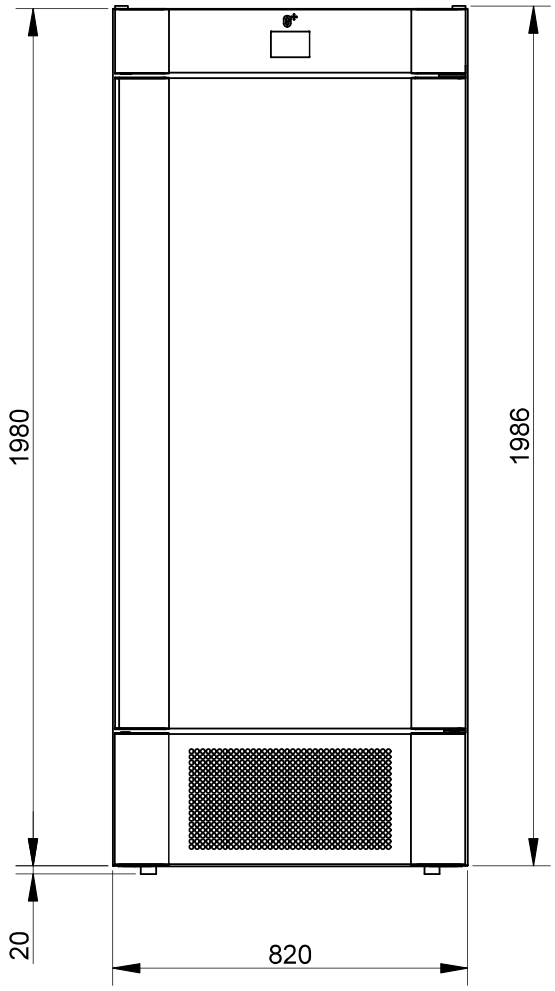

Optional Extras:
- Glas door with LED lighting
- Left hinged door
